RESEARCH INTERESTS

Causal Network Traffic Modeling for Preemptive Congestion Control

My research aims to enable preemptive congestion control in datacenter networks. I formalize the causal domain knowledge underlying traffic patterns—temporal user behaviors, physical infrastructure states, and structural feature dependencies—and embed these principles as a priori constraints in predictive models. This yields explainable predictions that operators can trust, enabling proactive intervention before congestion impacts users.

EDUCATION

Aug. 2026 – Present	Johns Hopkins University Ph.D. in Computer Science	Baltimore, MD
Mar. 2018 – Feb. 2025	Hankuk University of Foreign Studies (HUFS) B.Eng. in Information and Communications Engineering - GPA: 3.96/4.00 (Top 1.8%) - Thesis: <i>A Data Forwarding Scheme Using Proportional-Fair Scheduling Algorithm in Edge Network</i> - Completed 19 months of mandatory military service	Yongin, Korea

WORK EXPERIENCE

Mar. 2025 – May. 2026	Research Intern Institute: Korea Institute of Science and Technology (Seoul, Republic of Korea) Role: Network traffic analysis and preprocessing; Multi-modal time-series modeling Built multi-modal network traffic DL pipeline for real-time urban crowd density prediction [3][4]
-----------------------	---

RESEARCH EXPERIENCE

Jun. 2024 – Jun. 2025	Extracting Structural Causality in Data Feature Dependencies Institute: AI Education Institute, Hansung University (Seoul, Republic of Korea) Embedded Bayesian Network-derived feature causality into CTGAN, reducing causal error by 92% [2]
Mar. 2024 – Oct. 2024	Modeling Physical Infrastructure Causality for Adaptive Traffic Routing Institute: Information Systems Lab, HUFS (Yongin, Republic of Korea) Developed adaptive routing algorithm via traffic-infrastructure causal modeling, reducing latency by 9% [1]
Sep. 2023 – Dec. 2023	Benchmarking Generative Models for Data Synthesis Institute: AI Education Institute, HUFS (Yongin, Republic of Korea) Benchmarked generative models for temporal-causal pattern synthesis in multivariate time-series data [5]
Sep. 2022 – May. 2023	Uncovering Temporal Causality in Network Traffic Patterns Institute: Mobile Distributed Computing Lab, HUFS (Yongin, Republic of Korea) Validated temporal causality in traffic patterns through LSTM-based prediction, achieving 94% accuracy vs. 3-9% for memoryless statistical models

Korea Police World Expo (KPEX) 2025

Incheon, Republic of Korea

Presenter, Korea Institute of Science and Technology (KIST)

TEACHING EXPERIENCE

Mar. 2024 – **Network Security Course** at HUFS

Jun. 2024 Instructor: Prof. Seongho Jeong

- Graded assignments and provided feedback for 30+ students with Q&A sessions

Sep. 2021 – **Algorithm Analysis and Design Course** at HUFS

Dec. 2021 Instructor: Prof. Sayed C. Shah

- Provided detailed code reviews and debugging support for 50+ students

SCHOLARSHIPS

Mar. 2024 President's Scholarship (**Full tuition**), HUFS

Sep. 2023 Hyoryeong Merit Scholarship, Cheong-gwon-sa Scholarship Foundation

Sep. 2023 Academic Merit Scholarship (**One-quarter tuition**), HUFS

Mar. 2023 Dean's Scholarship (**Half tuition**), HUFS

Sep. 2022 President's Scholarship (**Full tuition**), HUFS

AWARDS

Dec. 2023 Best Paper Award, NCAEIC 2023 – ICT-AES

Dec. 2023 Excellence Award, Capstone Design Project, HUFS

Dec. 2023 Excellence Award, Data Creator Camp, Ministry of Science & ICT

Sep. 2020 Creative Award, National Defense Start-Up Challenge, Top 25/939

NOTABLE ACTIVITIES

- **Community Volunteer** – Regular Donor, Senior & Youth in Crisis, GFoundation, (Mar. 2025 – Present)
- **Conference Staff**, Korea Internet Conference (KRNet) 2023 – Assisted with program coordination, logistics, and technical support
- **Mentor**, AdvICE (Programming Club), HUFS (Sep. 2022 – Dec. 2022) – Guided students in Python algorithm design and competitive programming
- **Communications Specialist**, Republic of Korea Marine Corps (Jun. 2019 – Jan. 2021)

TECHNICAL SKILLS

Programming & Development

Python, C, C++, Java, R, Bash, Git, Linux

Networking & Traffic Analysis

Wireshark, hping3, Ostinato, ns-3, TCP/IP

Machine Learning

PyTorch, TensorFlow, Keras, Numpy, Pandas, Matplotlib

Embedded & IoT

Raspberry Pi, Arduino
